Benefits of G-Force Automation Gate KITS

- | | |
|---|---|
| ✓ Safe & Easy | Our Motors are all Low Voltage 12V. There are no dangerous Mains Voltages at the motor. Everything is run off Low Voltage 12VDC with Battery backup |
| ✓ Convenient Low Voltage 12V AC | Simply plug in the direct feed AC Transformer and extend the low voltage lead up to 50m down to the gate (just like low-voltage garden lighting). A backup battery is standard.
Where AC power isn't available, go for our Solar Option |
| ✓ Economical SOLAR Option | Solar Kits come with Solar Panel and Stand.
Simply mount the Solar Panel facing due north within 30m of your gate in the best available sunlight. This will keep the Battery charged up for you to use whenever its needed |
| ✓ Easy to Install - Yes, You can do it! | Our Kits are SIMPLE to install by a home Handyman, following step-by-step Instructions
All Kits are designed for easy DIY Installation. Even the Heavy Duty 450/900 Kits feature simple features such as User-adjustable Limit Switches to set gate open & close positions and Quick Allen Key Manual Release for emergency exit |
| ✓ NO Electrician Needed - Do it yourself | Our Motors don't run off 240V AC Mains Power. They are Low Voltage. This means there's no dangerous voltages. Don't pay an Electrician. SAVE your money. It's like low-voltage garden lighting.
Installation can be safely done by a home Handyman. |
| ✓ NO Mains Power Needed - Save \$\$\$ | You can safely extend the low-voltage Plug Pack lead up to 50m to reach an available power point.
And being low voltage, you don't need to bury the lead 600mm underground like 240V AC Mains Power. You can simply run the low-voltage lead along a fence line or in a shallow trench |
| ✓ Australian Design | The 450/900 Kits have been designed and tested in Australia for Australian conditions. Our products are thoroughly Engineered & Tested and built to the highest quality standards. |
| ✓ All in One Box - Ready to install | Everything you need is in the Kit, incl all fixing hardware, cables and brackets.
Battery & Control Board are all contained in the one pre-wired Master Motor. For Double Gates, the Slave Motor is connected across the drive by 2-core cable supplied. |
| ✓ Expert Advice & Technical Support | We pride ourselves on our pre-sales advice and post-sales support. We offer a FREECALL 1800 111 930 number for your convenience.
G-Force staff have many years experience installing and servicing automation products and are ready to help you.
Why not email us a photo of your gate so we can advise the most suitable product on the spot. |
| ✓ No Fuss 2 year Warranty | We fully support our product, offering a factory-backed 2 year warranty. Whatever can't be diagnosed and rectified over the phone can be returned to our factory for repair or replacement. |
