

INNOVATIVE Access Control Solutions for Residential, Commercial & Industrial Applications

We OFFER SOLUTIONS that are -

1 APPROPRIATE (to Site and required Application)

We won't propose or sell you Automation that is not appropriate for the site or its application. It's just not worth it. For us or for you.

That's Why WE ASK YOU QUESTIONS about -

- The condition of existing gates, the environment, requirements & expected usage
- And the MOST IMPORTANT QUESTION -
Q. What do you really want to achieve by installing this automation?
A. Security? Convenience? Traffic Control? OH&S?
- AND then we present alternative approaches that often you've not even thought about - drawing product from the BEST international **LEADING BRANDS**

2 COST EFFECTIVE

We Offer the most Cost-Effective Solution for your Needs. We're not in the business of pushing our highest \$ products. Products are suggested on a fit-for-purpose basis

- G-Force PRO Solutions can also often save end Customers many \$\$\$ when compared with Mains Powered alternatives. Drawing from our experience & expertise with Low Voltage DIY Gate Opener Kits, we can often specify Solar or Low Voltage Alternatives that other companies can't
- Another Example - Where a Sliding Gate is required - It may more cost effective to convert existing swing gates into a sliding gate rather than installing a brand new gate. This can save many \$\$\$ while retaining the same facade

3 INNOVATIVE

We have the Technical Skills & Creative ability to offer innovative solutions to your Automation & Access Control 'Challenges'.

- For Example - Use of Solar-powered GSM (Entry) Intercoms (using the Mobile Phone network) at remote sites for providing controlled access to sites
- We can also advise you or your Customer on traffic flows, gate designs, automation & advanced access controls
- Our EXPERIENCE with Industrial Product and advanced Access Controls gives us the edge when quoting your work

WHAT gives G-FORCE AUTOMATION 'the Edge'?

**We have the KNOWLEDGE, SKILLS & EXPERIENCE
to Advise AND Support YOU**

1 We provide an in-house FABRICATION Service

Photos - In house fabrication of dual-height truck entry Bollards for recent large commercial job
We can supply complete gates

2 We can PRE-CONFIGURE product for easier installation

We can pre-configure your PRO Product to make installation so much easier

Photos - In house configuration of 12x 6m Boom Gates for installation on a single Trucking Site

3 We have the INSTALL Experience to HELP YOU

Our expertise extends way beyond the supply of product alone!

With our many years of industry experience and intimate knowledge of product available, we can advise you at PLANNING LEVEL to help you avoid costly (& often embarrassing!) Project failures or oversights. Often, your approach to a job can make or break you!

We can OFFER -

- On-Site Assessment of Needs (or by phone, fax, using Site Plans, digital photos, etc.)
- Practical Advice on Project Approach & Execution
- Cost-saving Advice on Implementation
- Innovative Solutions for Traffic Flow & Automation
- Integrated Solutions for Access Control
- The option of Solar or Low-Voltage installations that can also often save YOU thousands of \$\$\$ when compared with Mains Powered alternatives
- Advice on Gate designs
- Gate, Fence & Bollard fabrication service
